SA Series Sealers

FOR REGULAR AND HIGH-TENSILE STEEL STRAPPING

Description

The Samuel SA Series sealer has been designed for a broad range of common strapping applications. This sturdy sealer is built with hardened tool steel, to provide you with a lifetime of reliable use under demanding conditions. The sealer is available in three models which can handle standard and high tensile strapping in 1/2", 5/8" and 3/4" wide and in gauges from .015" to .023". Used in combination with a standard feedwheel type tensioner, the SA Series sealer is designed to crimp an open flange seal in a double down notch configuration.
