

YOUR SUCCESS IS OUR BUSINESS.

INNOVATIVE STRUCTURAL COMPONENTS

Samuel Roll Form Group, part of the family of Samuel companies, is a leading supplier of cold-formed and hot-rolled steel components and value-added services to industries across North America.

Whether you need standard or custom products, Samuel Roll Form Group is focused on serving customers who are looking for a strategic supplier relationship. Investing in industry-specific forming equipment and offering value-added capabilities, Samuel Roll Form Group ensures our customers improve their business efficiencies by limiting the need for secondary operations.

AT A GLANCE

- Cold-Formed & Hot-Rolled Steel Sheet Piling
- Steel Pipe Piling
- Railcar Components & Accessories
- Custom Forming & Metal Fabrications
- Highway Guardrail/Guiderail

SAMUEL ROLL FORM GROUP

Offering manufacturing and fabrication in both Canada and the United States, and with inventory available from several strategically-located facilities, Samuel Roll Form Group offers cost-effective and efficient service to our customers.

HEAVY CONSTRUCTION

We are a major North American producer/supplier of cold-formed steel sheet piling sections for use in bridges, highways, slope stabilization, remediation, water, sewer, rivers, ports, marinas, harbors, piers, foundations and other civil engineering applications.

Products that we produce and distribute include: Cold-formed Sheet Piling, Hot-rolled Sheet Piling, H-Pile, Pipe Pile, Hot Rolled Structurals, Pile Points, Tie Rods and Highway Guiderail/Guardrail systems. We also have a significant inventory of rental sheet piling available at our distribution centers.

RAIL INDUSTRY

We have experts in various aspects of the transportation industry — from marine to trucking to rail. Samuel RFG is truly a “one-stop shop” for railcar manufacturing including engineering and design services for structural components, doors, boxcar floors, uncoupling levers, and roofs.

CUSTOM FORMING

Specializing in longer, stronger, and heavy-gauge roll formed products that are not available elsewhere, Samuel RFG’s Custom Forming team manufactures a range of custom products — everything from load-bearing, structural components for marine applications, bridges and parking garages to high-volume flatbed truck fenders, shelving units and sports arena seating.

VALUE-ADDED SERVICES

- In-Line Notching
- In-Line Plasma Cutting
- Piercing
- Punching
- Brake Forming
- Automated and Manual Welding

TECHNOLOGIES

- Precision Drilling & Assembly
- Painting and Coating Solutions
- Innovative Product Design Solutions

ABOUT SAMUEL

Founded in 1855, Samuel, Son & Co., Limited, is a family-owned and operated, integrated network of metal manufacturing, processing and distribution divisions — providing seamless access to metals, industrial products and related value-added services. We leverage our industry expertise, breadth of experience and the passion of our people to help drive success for North American business — one customer at a time.
