Re: Compliance with European Union REACH Regulation (EC) 1907/2006

Dear Customer,

Sierra Aluminum, a Division of Samuel, Son & Co (USA) Inc. (Sierra) manufactures and sells aluminum extrusions in the 6000 series family of aluminum alloys, specifically 6063, 6061, and 6005A. Sierra may also perform other manufacturing/processing operations on these aluminum extrusions which may include any or all of the following; applying an anodized or painted finish, thermal improvement, or fabrication.

In any of the configurations listed above, under REACH Article 3.3, the final aluminum extruded product is defined as an "article". "Articles" are only required to be registered if they meet both of the conditions listed in REACH Article 7.1. The "articles" manufactured by Sierra do not meet both of the conditions and as such require no specific action with regard to REACH.

Please contact me at (951) 781-7800 or richard.medina@sierraaluminum.com.

Sincerely,

Richard Medina

Environmental Health & Safety Manager
