# MODEL SA11-D6 / SA11-D10 Sealers

FOR REGULAR AND HIGH-TENSILE STEEL STRAPPING

## Description

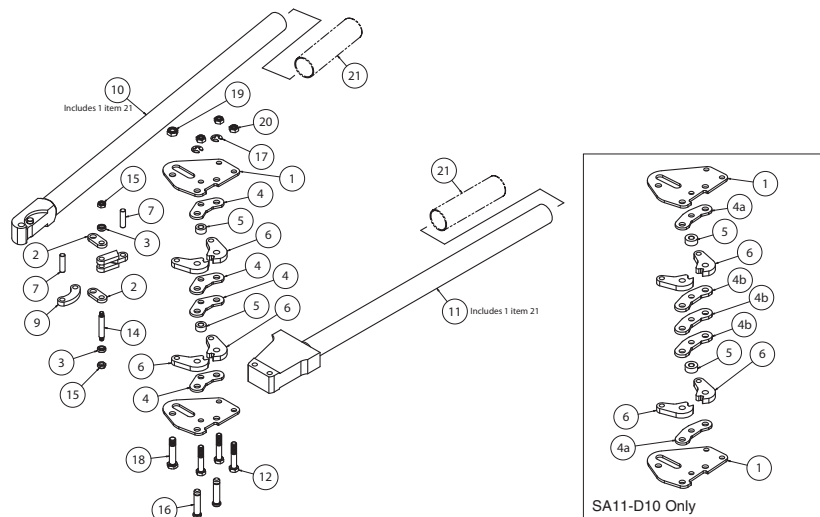

Samuel SA11 sealers have been designed for a broad range of common strapping applications. These sturdy sealers are built with hardened tool steel, to provide you with a lifetime of reliable use under demanding conditions. The SA11 is available in two models which can handle standard and high tensile strapping in gauges of 3/4" and 1 1/4". Used in combination with a standard feedwheel type tensioner, the SA Series sealer is designed to crimp an open flange seal in a double up-notch configuration.
