HIPPO SQUARE BAG

The HIPPO square airbag was designed and created to brace products with a void space greater than 12 inches wide. The HIPPO bag touches more product area, bracing loads without the need for additional dunnage material. Made with moisture-resistant materials and an extremely durable outer shell, the HIPPO square airbag is also AAR verified for F2-associated methods.

For many years, the practice has been to use corrugated dunnage to reduce void space to 12 inches or less; however, more companies are now looking for ways to streamline their loading practices. The HIPPO fills in approximately 1 minute, significantly reducing load time, and is compatible with our Turbo Flow inflation systems.

We invite you to experience the Samuel advantage by contacting us today!

Samuel Packaging Systems Group, part of the family of Samuel companies, is a leader in the design, manufacturing and distribution of packaging, unitizing and product identification solutions.

FEATURES

- · Fills voids greater than 12 inches
- Extremely durable outer shell
- · Level 1 AAR Verified
- Re-positionable and recyclable
- · Covers more surface area
- · Simplified loading
- · Moisture resistant
- · Reduces loading time
- Inflates in approximately 1 minute
- 2.5 PSI Max
